IRFAN ALI JAT

DevOps & Cloud Engineer

Summary

Entry-level DevOps and cloud engineer with hands-on project experience in AWS, Kubernetes, Terraform, and GitOps delivery. OCI 2025 Certified Foundations Associate completing a BSc in Computer Science. Seeking a DevOps, Cloud, or Platform Engineering role.

Technical Skills

- **Cloud:** AWS (EC2, VPC, S3, IAM, RDS, Lambda, DynamoDB, CloudWatch, Route 53), OCI
- **DevOps:** Terraform, Docker, Kubernetes, Helm, GitHub Actions, Argo CD, Git
- **Observability:** Prometheus, Grafana, Loki, Alertmanager
- **Languages & Systems:** Python, Go, Bash, Linux

Hands-On Experience

Independent DevOps & Cloud Projects Self-directed · Remote · 2025 – Present

- Provisioned a 24-resource Terraform AWS environment across two availability zones with S3 remote state, DynamoDB locking, private RDS, and least-privilege IAM.
- Built a two-repository GitOps pipeline with GitHub Actions and Argo CD, using commit-SHA image tags, digest-based deployment, drift detection, pruning, and self-healing.
- Deployed Prometheus, Grafana, Loki, and Promtail across 14 scrape targets, with 3 PrometheusRule alerts and a 6-panel dashboard.

PROJECTS

- **Kubernetes Operator for PostgreSQL Cluster Management** **db-operator**
  - Built a Go Kubernetes operator with CRDs and controller-runtime to manage PostgreSQL clusters declaratively, with automated S3 backups and Prometheus metrics.
  - Packaged it with Helm and deployed it through Argo CD, using GitHub Actions for tests, image builds, and Trivy vulnerability scanning.
- **Serverless AWS Cost Optimization and Governance Platform** **costguard**
  - Built a Terraform-provisioned serverless cost governance platform using Lambda, EventBridge, Cost Explorer, and DynamoDB.
  - Added spending anomaly detection, orphaned-resource discovery, Slack alerts, and automated testing and deployment through GitHub Actions.
- **Peer-to-Peer File Sharing Platform over WebRTC** **fizzshare**
  - Developed a peer-to-peer file-sharing platform using TypeScript, WebRTC, WebSocket signaling, and a TURN relay, with SHA-256 integrity checks and QR-based sharing.
  - Containerized the application with Docker and deployed it on AWS EC2 using GitHub Actions automation.

CERTIFICATIONS

- OCI 2025 Certified Foundations Associate — Oracle
- Introduction to DevOps — IBM / Coursera
- AWS Cloud Practitioner Essentials — AWS/Coursera
- AWS Cloud Technical Essentials — AWS/Coursera

EDUCATION

BSc in Computer Science — University of Sindh (SULC), Jamshoro, Pakistan Expected Dec 2027

Relevant coursework: Operating Systems, Computer Networks, Data Structures, Database Systems
